Quarterly Report on Disturbed Acreage

Dear Mr. Smith:

This letter and the enclosed drawing constitute the White River Shale Oil Corporation's (WRSOC) Quarterly Report on Disturbed Acreage for the third quarter of calendar year 1983.

At the end of the second quarter of 1983, 157 acres had been disturbed and approximately 177,000 cubic yards of topsoil had been placed in long-term stockpiles. During the third quarter of 1983, 3 additional acres were disturbed, bringing the total disturbance to 160 acres. Additional topsoil salvaged from the construction area increased the quantity of stockpiled topsoil to approximately 179,000 cubic yards.

The enclosed map delineates the additional acreage disturbed as of September 30, 1983. Please note that the areas shaded in yellow indicate previous disturbances and the areas shaded in orange indicate the new disturbances which have occurred during the third quarter of 1983. No additional disturbance occurred in the vicinity of the alluvial wells and associated access road. Consequently, a map for this area has not been submitted with this report; please refer to our second quarter 1983 report for the extent of disturbance in this area.

If you have questions or comments concerning the report, please feel free to call for assistance.

Sincerely,

Ralph A. DeLeonardis

Ralph A. DeLeonardis
Senior Environmental Engineer
